

Operations / Asset Manager

Renewable energy seems pretty simple. A turbine spins when it's windy and a solar panel catches the Sun's energy. A lot more happens behind the scenes! It's my job to manage when we are going to generate energy and sell into the market, the maintenance schedule and the onsite workers. I keep those electrons flowing!

Environment

Indoor office and outdoors at project sites

Working at a computer

Working with others

Working with hands

Solving problems

Being creative

Working with people

Leading and guiding
