

Structural Steel Erector

Renewable energy projects take a lot of steel to build. That's where I come in. I erect and dismantle steel frames of buildings and other structures. Sometimes temporary, sometimes permanent. I've never met an I-beam I didn't like. No Jenga here, our steel structures are built to last.

Environment

Outdoor project sites

Working at heights

Using hands and tools to control or feel objects

Working with hands

Solving problems

Being creative

Working with people

Leading and guiding
